Improve Productivity with Better Access to Information
Enterprise Content Management with GlobalSearch

Manage content more efficiently with an industry-leading solution! GlobalSearch Enterprise Content Management software simplifies common tasks by delivering tools to capture, archive, retrieve, share, and manage your business information when you need it most.

✓ **Reduce the cost and effort** of database setup with proven, pre-designed solution templates for various functions and industries.

✓ **Maintain compliance** with user-based access controls, redactable information, and easy access to frequently audited documents.

✓ **Simplify document processing and retrieval** with OCR assisted indexing and powerful yet intuitive search capabilities like layered searching.
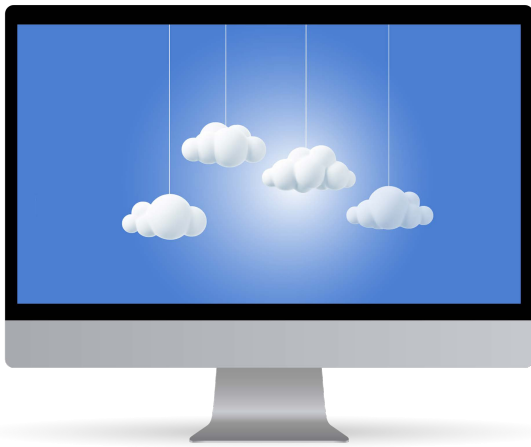

✓ **Scale your solution** as your business grows with additional features and functionality, including automated workflows, advanced document capture, and intuitive web forms.

Volunteers of America®
NORTH LOUISIANA

" We quickly learned the sky's the limit with GlobalSearch.

Melissa Godinez, Director of Technology and Strategic Operations at Volunteers of America, North Louisiana. "

Worry Less by Taking GlobalSearch to The Cloud

Implementing GlobalSearch Cloud reduces risk and takes some of your biggest business stressors off your hands

Painless and affordable setup with proven, re-configured solutions that can be implemented in just days

Gain instant access to your data from anywhere through a web browser, improving collaboration across departments and locations

Ensure business continuity in the event of a disaster with secure, offsite servers and remote access to information
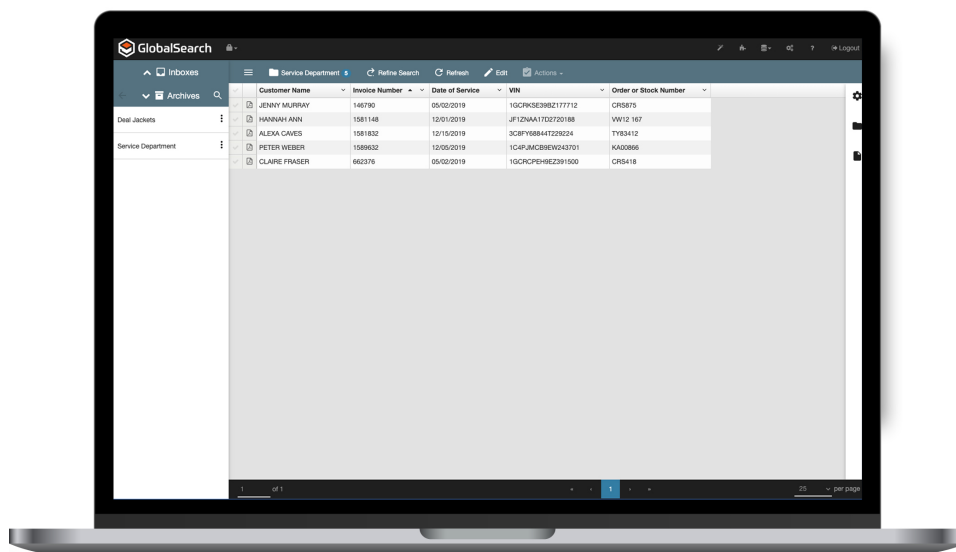

Eliminate backups, upgrades, and server maintenance with professionally managed, highly secure servers

Highly Reliable Service

With 99.9% uptime and SOC 1, 2 and HIPAA compliance, our team does everything in their power to ensure your information is safe and accessible to you.
