

# Zebra Healthcare Solutions

## Help Improve Patient Safety and Operations

The ability to instantly verify patient information is crucial to help reduce the instance of clinical errors. By connecting patient data, clinicians and providers in real time using Zebra's healthcare technology solutions, you can empower clinicians using advanced hospital printers, barcoded wristbands, labels, scanners, mobile computers and tablets to positively identify the right patient, the right medication, the right specimen, the right medication dose, and the right procedure at the right time.

With Zebra's purpose-built solutions, you can ensure easy access to critical patient data through seamless integration and device management:

- **Zebra WorkforceConnect™** allows you to access information, take voice calls without being tied to a desk phone, instantly reach a co-worker, or manage a team located across a healthcare facility with push-to-talk and secure text messaging.
- **Zebra VisibilityIQ™** gives you clear, instant business intelligence about your Zebra devices for data-driven insights to enable smoother operations, and includes VisibilityIQ Foresight™ and VisibilityIQ OneCare™.
- **Zebra Mobility DNA™** is a suite of enterprise solutions designed to help maximize mobile user productivity and minimize IT complexities over the lifespan of a Zebra computer or tablet device. Mobility DNA offers secure solutions to help deploy, manage, and support every stage of your devices' lifecycle.
- **Zebra OneCare™** provides unmatched service, support and repair right from the manufacturer across the full product range, limiting unexpected disruptions and unbudgeted repairs.
