

# AEROCUT X

Air feed slitter / cutter / creaser / perforator / digital print finishing system

## Specifications

<b>Speed, sheets per minute*</b>	24
<b>Sheet capacity*, inches</b>	4
<b>Paper weight*</b>	120 - 400 gsm
<b>Paper size, inches</b>	8.27 x 8.27 to 14.5 x 47.2**
<b>Power supply</b>	100 - 120 V, 50/60 Hz
<b>Dimensions (D x W x H), inches</b>	30 x 41.8 x 42.3
<b>Weight, pounds</b>	595

\*May vary due to variations in paper and power supply

\*\*Flex mode

The Aerocut X is an ideal solution for digital print finishing applications such as business cards, postcards, greeting cards, tent cards, leaflets and more, as it allows an operator to change jobs in seconds without the need to connect a PC. Six rotary slitting knives (the combination of 2 single slitters + 2 double slitters) and a cutting unit ensures accurate and crisp finishing on every run. Creasing pressure can be adjusted in 5 levels instantly by shifting the lever. The Aerocut X also includes 2 perforating wheels which enable the machine to perforate sheets along the feeding direction. Thanks to the large, 7" color touch screen, an operator can run the machine intuitively and instantly. The newly designed user interface makes it easy to fine-tune settings for print jobs. The ultrasonic sensor precisely checks for double feeds, even if the machine is fed black or colored paper. The expandable feed tray can accommodate paper up to 29.5" in length (program can accept up to 63").

Most paper printed on the today's digital printers can easily be finished on the X. The patented Tri-suction Feeding Mechanism does not require complicated double feed adjustments. Just load paper, select the volume of air, and the paper will be fed consistently. It also helps prevent the machine from stopping due to double feeds or paper jams.

The new ejection pause function allows the first card to be paused at the machine's eject port which helps an operator to place the card guide plates exactly where they should be according to the card width.

The Aerocut X can read barcodes printed on the leading edge of prints. Its check function alerts the operator when a mismatch is detected between the print and machine settings. The change function automatically adjusts the machine settings according to the barcode scanned and the job recalled. These functions can be switched according to the occasion. The X comes with a PC software (Lytrud Intellicut\*) that allows operators the ability to impose, format, and add personalized information to documents for fast and efficient finishing. Job programs are sent to the finishing machine through ethernet.

The Aerocut X has detachable rollers that make it easy to clean the rollers themselves and inside of the machine, as well as provide easy access to the area in the event of a paper jam. Similarly, the perf and crease units can be removed too.

# AEROCUT X

Air feed slitter / cutter / creaser / perforator / digital print finishing system

## Features

### INTUITIVE OPERATION

The 7" color touch screen allows operators to set job programs and run the machine intuitively and instantly.

### FLEX MODE

Allows operators to cut multiple sized cards from a page and add creases. It enables designers and printers to create new aspects of applications.

### PATENTED FEEDING MECHANISM

Tri-suction Feeding Mechanism reduces risks of double feeds and mis-feeds drastically, therefore it prevents paper jams and enhances productivity.

### ROBUST SLITTERS AND CUTTERS

The self-sharpening slitter and blade unit allows the machine to cut up to 400 gsm.

### INSTANT JOB CHANGE

The X can change jobs instantly which makes it the ideal solution for finishing digitally printed applications.

### EASY MAINTENANCE

The X has detachable rollers which makes cleaning easy and gives better access to components.
